

JOIN OUR SCIENCE OLYMPIAD TEAM

WHAT IS SCIENCE OLYMPIAD?

Science Olympiad is a national science competition in which teams compete in various science events. Each year, up to 23 exciting S.T.E.M. topics covering a wide range of disciplines are selected for competitors to choose from!

STUDY EVENTS

These events will test your knowledge on various **biology, physics, and chemistry concepts**. Be an Epidemiologist in the event Disease Detectives or a Cryptologist in Codebusters!

Includes: Anatomy & Physiology, Heredity, Dynamic Planet, Entomology, Codebusters, Disease Detectives, and more!

LAB EVENTS

Perform experiments and build science lab skills in these events. Tasks include drafting up and carrying out experimental protocols. Live your dreams as a true mad scientist!

Includes: Crime Busters, Experimental Design, Potions and Poisons, Circuit Lab, Water Quality, Write It Do It and more!

BUILD EVENTS

These events will have you **engineer complex and creative designs**. Learn about the engineering design process and create towers, vehicles, wind turbines, or even planes!

Includes: Boomilever, Helicopter, Machines, Hovercrafts and Scrambler!

WHY SHOULD I JOIN?

Science Olympiad is the perfect place for you to not only **explore S.T.E.M. concepts beyond the classroom**, but also to learn and explore new topics! You will also have the chance to win medals and trophies, while also forming friendships with your entire team.

Interested? Join us at our team meetings!
